

Power capacitors

multicond

multicond are one-phase and three-phase power capacitors for reactive current compensation, developed for networks with many harmonics. Apart from a long working life and high current and voltage load capacity, safety in case of overload (all-pole overpressure disconnector) is a crucial advantage of the compact components, constructed in dry technology. Other features: good thermal conduction, low build-up of heat as well as reliable performance at high ambient temperatures.

Rated voltage U_n **280, 440, 480,
525 or 690 V**

Rated frequency f **50/60 Hz**

Power capacitor for reactive current compensation

Highlights

- Power from 1.5 to 37 kvar
- Capacitor rated voltage of 280, 440, 480, 525 or 690 V
- High level of safety through dry technology and 3-phase internal overpressure disconnector
- Including compact discharge resistor
- Long working life

The **Construction diagram** can be found on page 8.

multicond-UHPC power capacitors stand out through their combined safety concept of a self-restoring effect and 3-phase internal overpressure disconnector. In low voltage networks, inadmissibly high voltage peaks up to 3 times the rated voltage can occur through switching procedures. If these loads lead to flashovers in the dielectric, self-restoring takes effect. The capacitor remains fully functional as this happens. The 3-phase internal overpressure disconnector starts to work if the gas amount

released by the many self-restoring procedures causes a specific internal pressure. The lid of the aluminum casing bends slightly and the fuse disconnects the capacitor from the network.

Note: Depending on the network voltage and when used in detuned systems, a correspondingly higher capacitor rated voltage must be selected.

690V capacitors are also available in single-phase version.

Performance data and sizes deviating from the standard are available on request. Subject to change.

Example for order: Power condensator, 30.3 kvar to 440 V.

The corresponding order detail is as follows: **Type multicond-UHPC-30.3-440-3P**

Construction diagram

Common:

- Adapter box safe from finger-touch
- Expansion (a) by 12 mm maximum
- Clearance above 13 mm minimum

Mounting:

- M12 threaded bolts
- Tightening torque $T = 10 \text{ Nm}$
- Serrated lock washer J12 DIN 6797
- Hexagonal nut BM12 DIN 439

Adapter box:

D 95 (16 mm²) / D 116 (16 mm²)

- M4 terminal screw
- Adapter box $t = 30 \text{ mm}$
- Tightening torque $T = 1.3 \text{ Nm}$

D 136 (25 mm²)

- M5 terminal screw
- Adapter box $t = 33 \text{ mm}$
- Tightening torque $T = 2.5 \text{ Nm}$

All dimensions in mm. Not suitable for taking measurements.
